Summary of DEF for publishing on CPR’s website

(1) the key features of the platform and how it can be used to exchange information in an arbitration/mediation securely

DisputesEfiling.com Limited (DEF) is an English registered company which has developed a secure Cloud-based system to manage arbitrations and mediations as well as other forms of ADR. DEF is the only platform to facilitate seamless data transition for ArbMedArb and other hybrid forms. The Platform works by sharing or restricting access to uploaded documents via a unique yet simple permissions function.

With onboard messaging and bespoke email notifications the DEF Platform is the complete ADR management package ready to go out of the box.

Paper usage decreases dramatically when using DEF while cycle times increase as parties and their Attorneys work together with a greater collaborative spirit than when working using traditional, paper based process.

The DEF Platform is hosted in three geographically separate Tier 3 data centres in England and encrypts all data on the Platform. Our approach to data security continues to evolve in light of the ICCA, New York City Bar and CPR Cybersecurity Protocol for International Arbitration. Our fees are charged and are payable in Sterling by Bank transfer to DEF at the Bank account which appears on our invoices. Whilst registration is free no filing is possible until payment has been made.

(3) What does the fee cover?

- Single price point for each party to the arbitration, mediation or other ADR form
• A typical 2 party case therefore costs approximately $124 (£100) for those using CPR rules and Schemes (subject to exchange rate fluctuations)
• No additional charges for uploads or downloads
• 500MB data can be uploaded at any one time
• No limit to the number of neutrals
• 24/7/365 access subject to routine maintenance and infrastructure integrity
• 5GB of data space per case, expandable
• Purchase Tax (VAT) is not included and will be added at the point of invoicing
• High levels of data security
